P. IVA 01423760121 - R.E.A. n. 181144 - Albo artigiani n. 58343

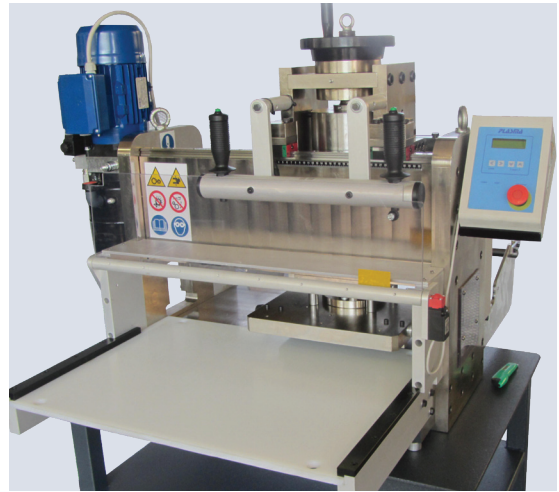

FU400 S A3 Punching machine

Power 50 tons - 400 V - electric equipment
Working area 550x400 mm

FU250 A2 Punching machine

Power 28 tons - 230/400 V - electric equipment
Working area 700x500 mm

FU200 S A3 Punching machine

Power 20 tons - 230/400 V - electric equipment
Working area 550x400 mm

FU120 A3 Punching machine

Power 15 tons - 230/400 V - electric equipment
Working area 550x400 mm

Machines for laboratories

Power from 3 or 5 tons - 230 V
Working area 350x250 mm

Power 10 tons - 230 V
electric equipment
Working area 350x250 mm

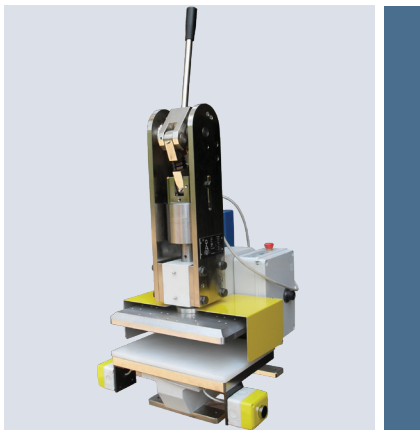

On request

POE50 S A4 Punching machine

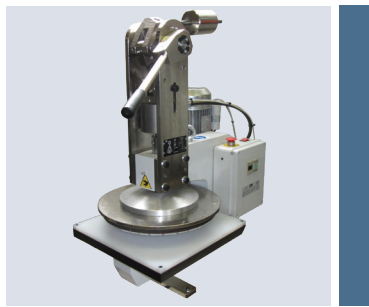

Power 5 tons - 230 V - manual or electric equipment - Working area 350x250 mm or Ø 250 mm

ECO50 S A4 Punching machine

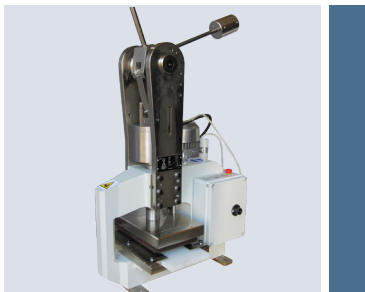

Power 10 tons - 230 V
manual or electric equipment
Working area 350x250 mm

Working area 360x360 mm

On request

Power 20 tons

PGMF 100

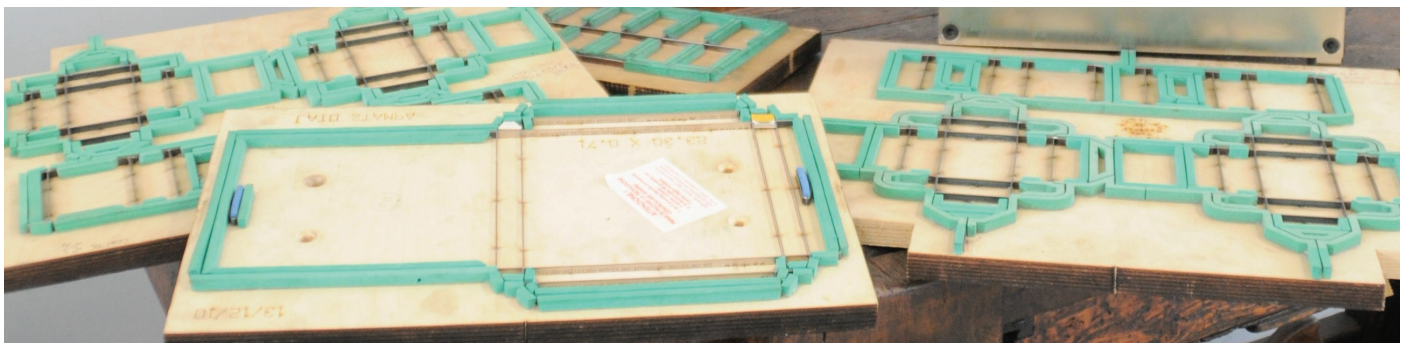

Force 700 Kg
Working area 130x130 mm

PGMF 1000

Force 1200 Kg
Working area 250x200 mm

Hollow-punch production

Made of steel or wood (American type) on client's request, for any type of punchable material, with cut and creasing. Our hollow punches can be mobile or fixed directly on the push surface.

Modularity, quality, simplicity and safety

Officina meccanica Giani Davide

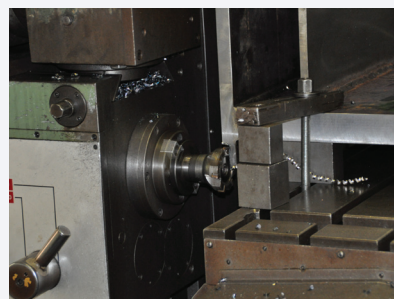

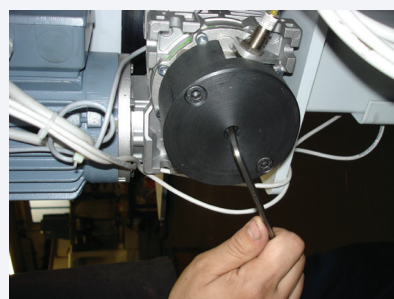

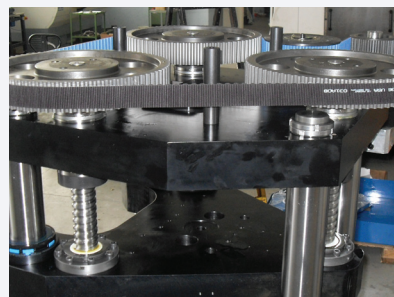

COMPANY PROFILE

Created thirty years ago for machining details on commission, Giani Davide Officina Meccanica specialized later in the production of arc-welded structures in the field of seaming and riveting, effectively cooperating with companies building plants for paper-transformation industries and similar.

Finally, it increased its experience by taking-over "FARVEL", a company that makes small presses for seaming and assembling small electric parts.

Today, the brand "GIANI PRESSE" is capable of supplying small-tonnage presses in compliance with EC specifications.

In order to meet the specific requests of our customers, a unique cooperation has been created between different companies that by networking and joining their skills, competences and jobs are capable of obtaining custom products which exactly comply with the needs of the customer.
